→ AN ASTRONAUT
EXPERIENCE

ESA's Education Office offers Master and PhD students a unique opportunity to add the excitement of space into their theses or final projects. Selected students will be able to develop a scientific experiment of their own design, with the help of leading European scientists.

The experiments will be carried out in microgravity conditions on parabolic flights, during the ESA Microgravity Research Campaign in spring 2012.

The deadline for applications is 12 July 2010.
